Professional Summary

Information Technology undergraduate at Chaitanya Bharathi Institute of Technology (CBIT) with hands-on experience in Python, SQL, AI/ML, backend development, REST APIs, data processing, and database-driven applications. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, software development, testing, and debugging. Experienced in developing full-stack and data-focused applications, building APIs, and validating data.

Education

Chaitanya Bharathi Institute of Technology (CBIT), Hyderabad *Aug 2024 – May 2027*
Bachelor of Engineering – Information Technology *CGPA: 7.91*

Dr. B.R. Ambedkar Women's Polytechnic, Karimnagar *Jul 2021 – Jun 2024*
Diploma in Computer Engineering *CGPA: 9.79 – Rank 1*

Technical Skills

Programming: Python, SQL
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Software Engineering: Software Development Life Cycle(SDLC),Exception Handling,Unit Testing,Debugging, REST APIs, API Integration
Web Development: React.js, Node.js, Express.js, Electron.js, JavaScript, HTML, CSS
Data & AI: Machine Learning, AI/ML, Data Processing, Data Cleaning, Data Validation, ETL, Data Analytics
Databases: PostgreSQL, MySQL
Tools & Cloud: Git, GitHub, Google Cloud Platform, VS Code, Jupyter Notebook, Google Colab

Experience

North South Foundation (NSF) *Dec 2025 – Jan 2026*
Data Analyst Intern *Hyderabad*

- Developed Python and SQL-based data-processing modules for educational datasets containing 10,000+ student records, supporting structured processing and analysis workflows.
- Built and validated application workflows for participation tracking, performance analysis, and automated reporting using Python and SQL.
- Designed SQL queries and backend workflows for data validation, preprocessing, and structured data processing.
- Performed debugging, verification, validation, and data-quality checks to ensure accurate application outputs and reliable processing workflows.
- Used Git for version control and followed clean coding practices while contributing to software and data-processing modules.

Projects

AI-Powered Remote Employee Productivity & Behaviour Analytics System *React.js, Node.js, Express.js, Electron.js, PostgreSQL, Supabase, Groq LLM*

- Developed a full-stack desktop application using React.js, Node.js, Express.js, and Electron.js for employee productivity monitoring and behavioural analytics.
- Designed REST APIs connecting frontend and backend services, integrating PostgreSQL and Supabase for application data management.
- Implemented authentication, activity tracking, real-time detection, screenshot monitoring, and productivity scoring workflows.
- Integrated Groq LLM (Llama 3.3 70B) to generate AI-powered productivity insights and behavioural recommendations.
- Tested backend services, database workflows, and API integrations while debugging application issues and validating system outputs.

Student Performance Analytics Platform *Python, SQL, JavaScript, HTML, CSS, Chart.js*

- Developed a web-based analytics platform using Python and SQL for monitoring academic performance across 10,000+ student records.
- Built data-processing workflows for data cleaning, transformation, validation, participation tracking, and performance analysis.
- Implemented automated analysis and report-generation workflows to support performance monitoring and decision-making.
- Designed interactive dashboards presenting district-wise, school-wise, and student-wise performance metrics with validated outputs.

Achievements

- Solved 207+ problems on LeetCode, including 100+ Medium-level problems, demonstrating strong Data Structures & Algorithms and problem-solving skills.
- Completed the GeeksforGeeks 160 Days of Problem Solving Challenge.
- Secured Rank 1 in Diploma in Computer Engineering.
- Active Member, CSI CBIT Chapter.

Certifications

Google Cloud Computing Foundations – NPTEL | Oracle Certified Foundations Associate | Certified AI Associate
